

AVS Enhance™

Detecting real property assets of Medicaid LTC applicants

All states have Asset Verification Systems, but not all identify all real property assets and transactions of Medicaid long-term services and support applicants. We go beyond simple data matching, providing a deeper analysis that can lead to significant cost avoidance.

THE STEPS OF OUR SOLUTION:

THE ADDED VALUE

- ✓ Increased cost avoidance and revenue
- ✓ Equal treatment of like applicants
- ✓ Fraud deterrence
- ✓ Program integrity and quality assurance
- ✓ Asset protection, monitoring and oversight
- ✓ Valuable information missed in current AVS platforms

THE OUTCOMES WE HAD WITH ONE STATE...

\$25 Million
Undisclosed Asset Value

\$125 Million
Cost Avoidance

\$13 Million
Recovery from Lifetime Liens

OUR TEAM

We are Commonwealth Medicine, the public service consulting and operations division of UMass Medical School.

Operating on behalf of state health and human service agencies, we help them save millions – in some cases billions – of dollars annually. We are distinguished by our:

- Commitment to improve health care for people and families nationwide
- Determination, as public employees, to protect and sustain health care financing resources
- Focus on supporting Medicaid programs provide high quality, affordable care to their members

We currently partner with 18 states to enhance health care financing operations.
